

Ordinary people + Simple actions = Volcano Preparedness

Stay Informed

- Visit the USGS web site and social media at: volcanoes.usgs.gov
- Use the Volcano Notification System (VNS). Register now at: volcanoes.usgs.gov/vns/ To receive regular volcano status reports
- Follow local emergency web sites and alert systems such as Pierce County Alert. www.piercecountywa.org/active_volcano

Get Prepared

- **Learn:** Determine whether you live, work or go to school in a volcano hazard zone.
 - **Inquire:** Ask local authorities about evacuation plans in your area.
 - **Prepare:** Create a Family Emergency Communication Plan. To your emergency kit, add items that can help your family cope with volcanic ash.
 - ✓ Extra medications
 - ✓ Oxygen for people with respiratory difficulties
 - ✓ Spare contact lenses, cleaning solution and eyeglasses
 - ✓ Plastic and tape to seal ash out of your house during periods of extreme ash fall
- For working outdoors:
- ✓ Respiratory mask (N-95 style)
 - ✓ Goggles

Example of an individual emergency kit.

Act When a Volcano Threatens

- Listen to emergency information about the volcano's status.
- Act when told to move off lahar-prone valley floors.
- If you are safe from lahars, find shelter to reduce time spent in volcanic ash.
