Benefits of SoundGRO

SoundGRO is a safe and effective fertilizer made from biosolids. Manufactured by Pierce County at the Chambers Creek Regional Wastewater Treatment Plant in University Place, it has many benefits over regular chemical fertilizers, including:

- **Slow release**—SoundGRO works over a longer period of time, decreasing the necessity for frequent fertilization.

- **Non burning**—SoundGRO has a low salt index and can be safely applied even in the hottest, driest weather.

- **Nutrient rich**—SoundGRO improves soil structure and adds important nutrients.

*SoundGRO meets Environmental Protection Agency “Class A Exceptional Quality” standards.*
