State law limits the total "regular" property tax levy to a maximum of \$10 per \$1,000 of assessed valuation. The aggregate levies of junior and senior taxing districts, other than the state, may not exceed \$5.90 per \$1,000 of assessed valuation. Within this limit the county can levy up to \$1.80 for general government services and \$2.25 for road construction and maintenance. However, state law also dictates that unless a higher rate is approved by a majority of voters through an election, the annual increase in property taxes is limited to the lesser of the implicit price deflator, or 1% of the amount of regular property taxes lawfully levied in the highest of the three most recent years in which such taxes were levied plus an amount applicable to new construction.

Overlapping rates are those of local and county governments that apply to property owners within the county. Not all overlapping rates apply to all county property owners; for example, although the county property tax rates apply to all City property owners, the Fire Protection Districts rates apply only to the property owners whose property is located within that district's geographic boundaries.
