## County Road Project 5534

### Finishing the 112 Street East Corridor

Public Works and Utilities has been improving the 112 Street East corridor from Pacific Avenue (SR-7) to the Puyallup city limits. Over the next two years much of 112 Street East between Woodland Avenue and 86 Avenue East will be under construction.

This project is the final segment of the overall corridor to be widened. The work will improve the corridor for both vehicle traffic and pedestrians and relieve present and future congestion along the route. Private utilities will also be moving their poles, lines, and pipes to make way for the widened road.

#### We're widening the road to add:

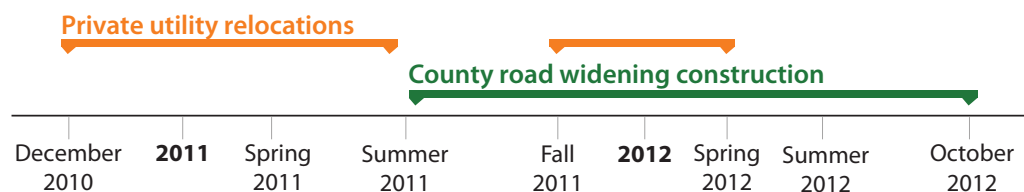

- 2 Lanes + Turn Lanes
- Sidewalks
- Street lights
- Retaining Walls
- Traffic Signals

#### What this construction means to you

To complete the work as cost effectively and efficiently as possible, we're planning to close portions of 112 Street East for short periods of time.

Overall construction and the road closure will result in detours and delay. In some cases there will be no quick alternate route. We'll provide advanced notice to give you time to find new ways to get where you need to go. Additional information on potential road closures will be provided when the construction schedule is finalized.

#### Project Schedule
