CRP 5740 | January 2011

Word on the Street:

Improvements to Key Peninsula Hy KPN/Olson Dr KPN/Cramer Rd KPN (Intersection)

January 2011

Schedule

Through March 2011

- Complete engineering, environmental documents, construction plans and estimates. Utility relocations by private utility companies completed.

January 2011

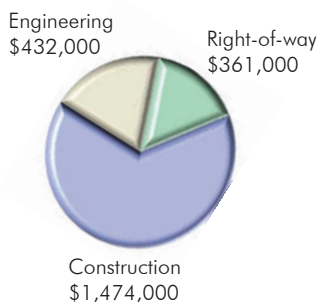

- Finalize acquisition of right-of-way property and easements.

May 2011

- Begin construction.

Cost

2.27million to be paid from the Traffic Impact Fee Funds, State Rural Arterial Program Funds and other sources.

What's happening

We're improving the intersection of Key Peninsula Hy KPN / Olson Drive KPN / Cramer Road KPN (CRP 5740). Improvements, include:

- Adding north bound and south bound left-turn lanes on Key Peninsula Hy KPN.
- Widening the existing roadway to include sidewalks at the intersection and paved shoulders.
- Improving the existing enclosed storm drain system and adding stormwater treatment facilities.
- Replacing the existing flashing beacon traffic signal system with a new fully actuated traffic signal system.
- Improvements are being designed to be consistent with the Key Peninsula Community Plan (KPCP) and will facilitate further, future, implementation of the KPCP.

The latest

- **Engineering:** We're finalizing the engineering phase for the roadway design, traffic signal system, traffic channelization, the enclosed storm drain system and stormwater treatment facilities.
- **Land:** Right-of-way acquisition is nearing completion.
- **Survey:** Surveys, that identify the existing roadway and right-of-way limits, are complete.
- **Funding:** The project is fully funded for construction.
