

Word on the Street:

Improvements to Key Peninsula Hwy KPN/Olson Dr KPN/Cramer Rd KPN (Intersection)

May 2008

Schedule

May 2008 to October 2008

- └ Preliminary engineering, environmental documents, plans and estimates.

November 2008

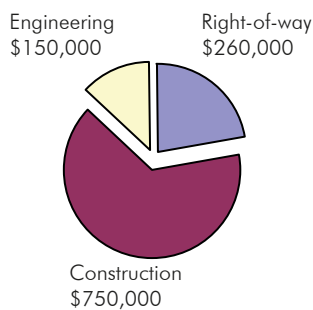

- └ Finalize Right-of-way plans and begin acquiring property and easements.

January 2009

- └ Begin final engineering (FE) phase.

Cost

1.16 million to be paid from the Traffic Impact Fee Funds, State Rural Arterial Program Funds and other sources.

What's happening

We're improving the intersection of Key Peninsula Hwy KPN / Olson Drive KPN / Cramer Road KPN (CRP 5740). Improvements, designed to relieve traffic congestion, include:

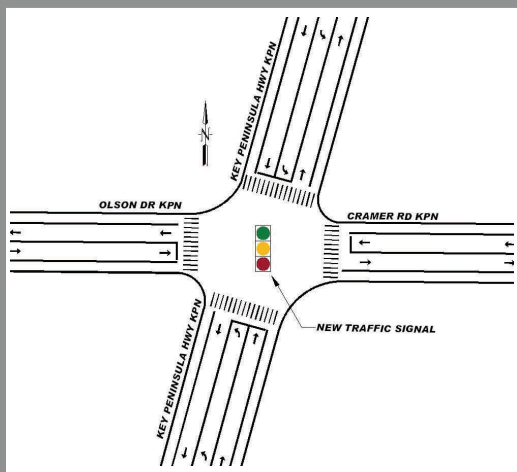

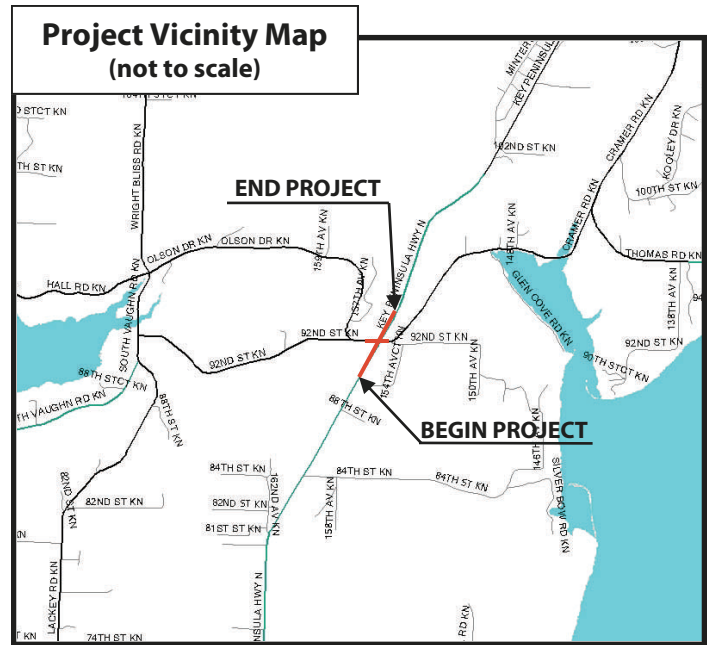

- Adding north bound and south bound left-turn lanes on Key Peninsula Hwy KPN.
- Widening the existing roadway to include paved shoulders.
- Improving the existing enclosed storm drain system and adding stormwater treatment and storage facilities.
- Replacing the existing flashing beacon traffic signal system with a new fully actuated traffic signal system.

The latest

- **Engineering:** We're now in the preliminary design phase for the roadway alignments, traffic signal system, traffic channelization, enclosed storm drain system, and stormwater treatment and storage facilities.
- **Land:** Preliminary right-of-way impacts are being assessed and the right-of-way schedule for the preliminary engineering (PE) phase is being prepared. When right-of-way plans have been completed at the end of the PE Phase in November 2008, we will proceed with the land appraisal process then send offer letters to affected property owners.
- **Survey:** Surveys that identify the existing roadway and right-of-way limits are complete.
