

Task Force Agreements

- No option can stand alone; a comprehensive solution package must be adopted
- Rather than conduct a detailed evaluation, the Task Force agreed to provide the technical team consensus guidance on the following items for the next phase of study:

- Potential issues and roadblocks
- Criteria
- Options for consideration
- Guiding principles for options

- Emphasis on options
- Specific recommendations for each option
- Funding strategies
- On-going progress review

Options for Consideration

- Raise levee along River Road
- Dredge river below Meridian
- Build setback levees in lower river and upstream
- Adopt non-structural approaches (e.g. land use regulations) restricting use of flood-prone lands
- Parallel alignment bypass channel

Work to be Done Today

- Determine emphasis for various options
- Provide input on specifics of options
- Determine future role of Task Force
