Executive Summary	S-1
S.1 Introduction and Purpose	S-1
S.2 Goals of the Muck Creek Basin Plan	S-2
S.3 Description of Basin	S-2
S.4 Stakeholder and Public Involvement	S-3
S.5 Problems, Proposed Solutions and Prioritization Process	S-3
S.6 Recommended Actions	S-4
S.7 Implementation Strategy	S-5
PART I Basin Characterization	
Section	
1 Introduction	1-1
1.1 Basin Plan Organization	1-1
1.2 Statement of Purpose	1-2
1.3 Goals and Objectives	1-3
2 Existing Programs and Information	2-1
2.1 Pierce County Programs	2-1
2.2 Other Programs, Policies and Regulations	2-2
2.3 Other Programs, Studies and Reports Relevant to the Basin Plan	2-3
3 Stakeholder Involvement	3-1
3.1 Stakeholders	3-1
3.2 Basin Plan Stakeholder Involvement	3-3
4 Current Conditions	4-1
4.1 Topography and Land Forms	4-1
4.2 Land Use and Population	4-2
Land Use	4-2
Current Population	4-3
4.3 Soils	4-4
4.4 Natural and Constructed Drainage System	4-5
Natural Drainage System	4-5
Streamflow Characteristics	4-6
Stream-Groundwater Exchange	4-8
Regional Groundwater	4-9
Constructed Drainage System	4-10
Water Systems	4-11
Agricultural Water Use	4-12

4.5	Water Quality	4-12
	Long-Term Water Quality Data	4-12
	Recent Water Quality Data	4-15
	LRI Landfill	4-16
4.6	Aquatic and Riparian Habitat	4-21
	Stream Evaluation	4-22
	Phase I: Pre-Classification Screening	4-23
	Phase II: Field Observations	4-26
	Critical Water Features	4-26
4.7	Upland Habitats	4-26
	Upland Flora	4-26
	Upland Fauna	4-28
5	Identification of Problems	5-1
5.1	Problem Definitions	5-1
5.2	Intermittent Flow	5-1
5.3	Flooding	5-2
5.4	Water Quality Degradation	5-3
5.5	Habitat Limiting Factors	5-3
	Riparian Function	5-4
	Fish Passage	5-6
	Sedimentation	5-5
	Channel Morphology	5-5
	Problem Plant Species	5-6
5.6	Future Population-Land Use/Natural Resource Conflicts	5-6
	Future Population	5-6
	Future Land Use	5-6
	Land Use/Natural Resources Conflicts	5-9

PART II Basin Plan Analysis

6	Flooding Problems	6-1
6.1	Flood and Drainage Problems within the Basin	6-1
6.2	CIP Modeling and Analysis	6-4
6.3	Potential Solutions – Capital Improvement Projects	6-7
6.4	Sites Requiring More Detailed Data or Analysis	6-9
7	Intermittent Flow and Water Quality Problems	7-1
7.1	Analysis of Causes	7-1
	Intermittent Stream Flow	7-1
	Water Quality	7-2
7.2	Potential Solutions	7-3
	Intermittent Stream Flow	7-3
	Water Quality	7-3

8	Habitat Degradation	8-1
8.1	Analysis of Causes	8-1
	Fish Passage and Low Flow	8-1
	Channelization	8-2
	Riparian Vegetation and LWD Removal	8-2
	Cattle and Horse Ranching Practices	8-3
	Reed Canary Grass	8-4
	Development/Water Quality	8-4
	Culverts	8-4

Part III Muck Creek Basin Plan

9.	Basin Plan	9-1
	Plan Summary	9-1
	Capital Improvement Projects	9-2
	Programmatic Measures	9-2
	Information Gaps	9-3
	Implementation Strategy	9-4
	Pierce County' s Basin Plan Objectives	9-4
	Plan Approach to Basin Needs	9-6
	Stormwater Impact Mitigation Through LID	9-6
	Fish Habitat Protection	9-8
	Compliance Assurance	9-9
	Land Use Management	9-10
	Critical Areas Conservation	9-11
	Public Education and Involvement	9-11
	Flood Hazard Management	9-13
	Risk Assessment	9-13
	Major Tributaries	9-14
	Ponded Water	9-15
	Water Quality	9-16
	NPDES Stormwater Management	9-16
	Basin Specific Water Quality Management	9-16
	Reed Canary Grass Management	9-18
	Riparian Corridor Management	9-19
	Instream Habitat Management	9-19
	Livestock/Riparian Interactions	9-20
	Stakeholder Involvement	9-21
	Specific Recommendations	9-22
	Capital Improvement Projects	9-22
	Flooding and Drainage Problems	9-22
	Water Quality and Habitat Improvement	9-26
	Programmatic Measures	9-29
	Additional Studies Recommendations	9-35

Part IV SEIS

10. Supplemental Environmental Impact Statement	10-1
Fact Sheet	10-ii
Summary	10-1
Alternatives, Including Proposed Action	10-7
Affected Environmental, Significant Impacts, and Mitigation Measures	10-16
Distribution List	10-33
11. References	11-1

Tables

S-1	Prioritized List of Recommended Measures
2-1	Summary of Regulations Applicable to Basin Planning
4-1	Land Use Patterns
4-2	Inventory of Storm Pipes and Culverts
4-3	Comparison of Water Quality Data to State Standards
4-4	Average Water Quality Data for Sites Along Muck Creek
4-5	Summary of Surface Water Quality Data for the LRI Landfill
4-6	LRI Landfill – Inorganic Parameters
4-7	Fish Species of Concern
4-8	Stream Reach Screening
4-9	B-IBI Scores at Various Stream Locations
4-10	Upland Species of Concern
5-1	Future Land Use Patterns (Zoning)
5-2	Percent Impervious Area Coverage by Tributary Area
5-3	Applications for Development in the Muck Creek Basin
6-1	Recommended Drainage Capital Improvement Projects (CIP)
7-1	Water Use in the Muck Creek Basin
9-1	List of Recommended Measures
9-2	Prioritized List of Recommended Measures
9-3	Water Quality Monitoring Parameters
9-4	Muck Creek Basin Plan Versus the 1991 Surface and Stormwater Management Plan: Effectiveness in Meeting Objectives
10-1	Comparison of Impacts
10-2	Goals of 1991 Plan
10-3	High Priority Projects in 1991 Plan
10-4	Comparison of Alternatives

Figures

S-1	Watersheds of Pierce County
S-2	Muck Creek Basin
1-1	Muck Creek Basin Vicinity Map
4-1	Muck Creek Basin Map
4-2	Muck Creek Basin 1992 Land Cover
4-3	Muck Creek Basin Existing Land Use
4-4	Muck Creek Basin Soil Association
4-5	Muck Creek Basin Surficial Deposits Along the Stream Channels
4-6	Flow Pattern Observed in the Muck Creek Basin November 4, 1999
4-7	Flow Pattern Observed in the Lower Muck Creek System September 19 and December 13, 2000

- 4-8a Average Daily Flows–Muck Creek at Roy
- 4-8b Average Daily Flows–Muck Creek North Fork at 8th Avenue East
- 4-9a Long Term Well Water Levels
- 4-9b Overlapping Ground and Surface Water Divides in Graham Area
- 4-10a Temperature Data-Muck Creek at Roy-2000
- 4-10b Temperature Data-Muck Creek at Roy-2001
- 4-10c Temperature Data-North Fork at 8th Avenue East-2000
- 4-11 Landfill Site and Monitoring Locations
- 4-12 Muck Creek Basin Reach Delineation
- 4-13 Muck Creek Basin Stream Survey and B-IBI Sites
- 4-14 Change in Prairie Coverage: 1955-1990
- 5-1 Muck Creek Basin Floodplain Map
- 5-2 Population Forecast for the Muck Creek Basin
- 5-3 Muck Creek Basin Future Land Use
- 5-4 Proposed Development within Muck Creek Basin
- 6-1 Drainage Investigation Sites
- 8-1 Impervious Area Coverage in the Muck Creek Basin
- 10-1 Recommended Monitoring Locations
- 10-2 Recommended Capital Improvement Projects

Appendices

- A Stakeholder Issues
- B Basin Boundary Revisions
- C Water Quality Data: Nisqually Tribe, Fort Lewis, and Basin Study
- D State Water Quality Standards
- E Field Observation Notes
- F List of Recent Projects
- G Problem Identification List
- H Miscellaneous Flow Measurements
- I Census Block Information
- J Impervious Area Calculations
- K Drainage Complaint Summary
- L CIP Descriptions and Sketches
- M CIPs and Programmatic Measures Prioritization
- N Programmatic and Study Recommendations
- O Goals and Objectives
- P Glossary
