1) The needs of impaired elderly: My Bachelor of Science degrees in Human Development and Nursing both lay a foundation for my knowledge of the aging process and understanding impaired elderly and their disease processes. Approaches to care management and medical management must be individualized and trust with care providers intact.

5) The needs of persons with developmental disabilities: As a seasoned RN, I understand the developmental issues and medical management of developmentally disabled individuals. Long term care options, resident rights and care management are paramount to their independence and success in the community. My experiences with DSHS allow me to understand the long term care options and how to access least restrictive alternatives.

6) Other areas relevant to the needs of incapacitated persons: Attorney WSBA #32870

I currently provide legal and registered nurse consulting services to clients who have Washington Registered Nurse developmental disabilities, traumatic brain injuries, dementia, or need assistance with their activities of daily living to include placement, care options and care management. I have been petitioner's attorney for one Pierce County guardianship case. From 2004-2006, I represented DSHS litigating vulnerable adult abuse cases in administrative hearings.
