Memorandum

WP59076

To: Holder of the *2008 Pierce County Stormwater Management and Site Development Manual*

From: Dennis Dixon, SWM Engineer

Subject: Update to 2008 SWM Manual

Our records show you are registered to have a copy of the *2008 Pierce County Stormwater Management and Site Development Manual* – SWM Manual. The SWM Manual was updated as part of Code Consolidation Phase III (Ordinance 2012-2s, passed 6/5/12, effective 7/16/12). The bulk of the changes were to correct minor errors and increase the readability but some changes could have a significant impact on your future or current projects. A list of all the changes is included in this mailing along with instructions for removing and replacing pages of the SWM Manual affected by changes. Copies of these documents are available on our website at: www.piercecountywa.org/manual.

There are three sections of County Code, Title 11, 17A & 18E that are at the beginning of the SWM Manual as reference materials. All three of these Titles have been updated since 2008 but are not included with this update package. For a current copy of County Code please refer to the County Council web site: www.piercecountywa.org/council

If you do not have a copy of the SWM Manual please email our office, pcwater@co.pierce.wa.us so we can correct our list of SWM Manual holders. For questions about the SWM Manual, current changes or potential impacts with the upcoming NPDES permit please contact me at: ddixon@co.pierce.wa.us.
