

Worm Composting Foothills Elementary

The second graders at Foothills Elementary sorted, analyzed, and graphed one day's worth of their schools trash and discovered there were a lot of natural resources being wasted.

They helped educate their school on what can be recycled and how to do a better job of it. They also built compost bins and started composting some of their food waste from lunch using Red Wiggler worms. Additionally, the worm bins will serve as an educational resource for staff and students.

Lessons:

- No Time To Waste
- Planet or Profit
- Compost Critters
- School Waste Audit
- Garbage Pizza Activity

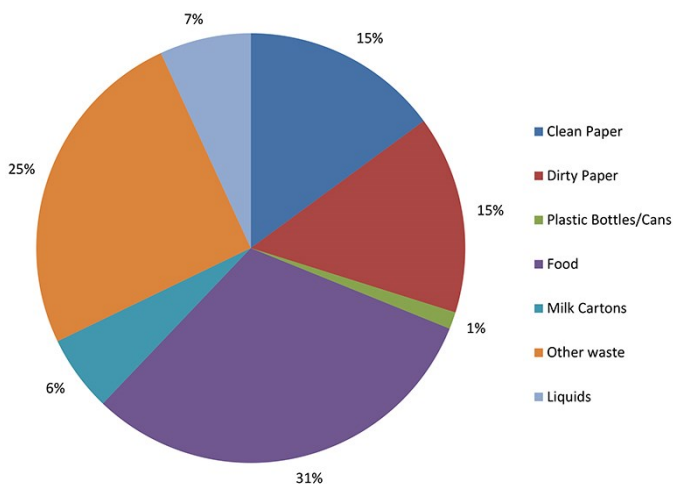

Project:

- Built Two School Worm Bins

Partnerships:

- Second Grade Staff and Students
- White River School District
- Pierce County Public Works
- Yelm Earthworm and Castings Farm
